

VISION JET™

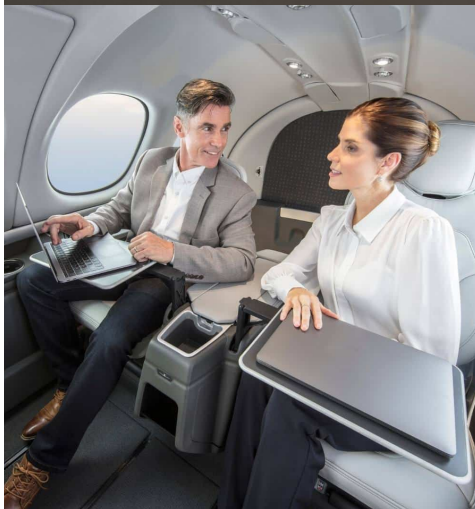

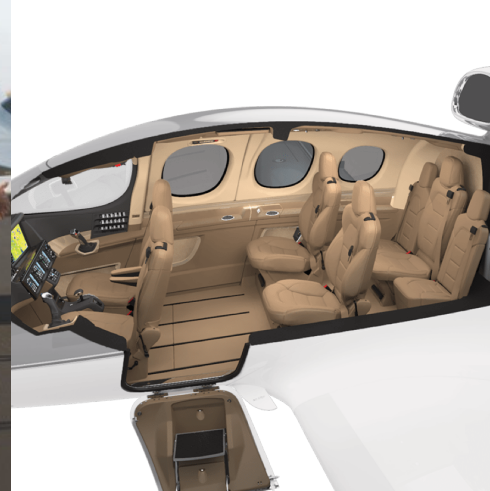

THE CIRRUS VISION JET

The Vision Jet is exclusive to FalconAir, with no other Australian company operating this exceptional aircraft.

The Vision Jet stands alone in its class as the safest, most efficient and quietest jet in the air today.

The Vision Jet is the ideal aircraft for travelling around Australia. With its short takeoff distance and an impressive operational range, the versatility of this jet is unmatched.

The Vision Jet offers an unrivalled passenger experience with the largest cabin in its class, which is fully configurable to your particular requirements.

SPACIOUS CABIN WITH UNRIVALED COMFORT

The Vision Jet cabin incorporates seamless styling and the latest technologies.

Each hand-stitched European leather seat offers commanding views from expansive windows that accentuate the spacious cabin.

With a foldaway 22 inch LCD display and Bose headsets, you can watch your own content from your own devices. Keep your devices fully charged with conveniently located USB ports and power outlets.

The modular cabin can be configured to your preferred specifications.

UNMATCHED SAFETY AND SUSTAINABILITY

The ultimate level of confidence starts with a total safety solution, exclusively offered in every Vision Jet.

Available for the first time, the Safe Return™ emergency autoland system joins an array of safety systems, including the Cirrus Airframe Parachute System® (CAPS®) designed to protect the pilot and passengers.

The Vision Jet has the lowest carbon emissions of any business jet aircraft, thanks to its innovative single-engine, V-tail design. The Vision Jet is also Sustainable Aviation Fuel (SAF) compatible.

CIRRUS AIRFRAME PARACHUTE SYSTEM®

SAFE RETURN™ EMERGENCY AUTOLAND SYSTEM

EXCEPTIONAL RANGE AND PERFORMANCE

With a takeoff distance of 620 meters and an operational range in excess of 1200 nautical miles, the Vision Jet is the perfect aircraft for your journey.

Typical private jet aircraft are limited to airports that can accommodate their greater takeoff distances, requiring transfers and road travel to reach your final destination. The Vision Jet overcomes these limitations, allowing you to arrive and depart from your preferred destination in seamless luxury.

COMPREHENSIVE MAINTENANCE SOLUTIONS

Alongside air charter services, FalconAir is a Cirrus Aircraft Authorised Service Centre covering both piston and turboprop aircraft. We are a CASA approved aircraft maintenance facility.

Our Authorised Service Centre facility is approved to conduct:

- Line maintenance
- Scheduled maintenance services
- Cirrus aircraft warranty works
- Pre-purchase inspections
- Fleet Aircraft maintenance
- Aftermarket services
- AOG callouts
